### SUMMARY

Dedicated Full-Stack Software Developer, in love with remote work and pair-programming. Experience includes coding, troubleshooting, and testing. I was recognized for my diligent and collaborative working style resulting in 98% on-time project completion.

### SKILLS

**Front-End:** JavaScript, React, Redux, jQuery, HTML5, CSS3, SASS, TypeScript, Tailwind, Bootstrap.

**Back-End:** Ruby, Ruby on Rails, MongoDB, PostgreSQL, Node, Java, Rest APIs.

**Tools & Methods:** Talend, Git, GitHub, Heroku, Netlify, Mobile/Responsive Development,RSpec, TDD, Chrome Dev Tools.

**Professional:** Remote, Pair-Programming, Teamwork, Mentoring.

### EXPERIENCE

#### TERRITORIO DIGITAL S.A.S

Software Developer

Remote

October 2022 - present

- Integrating Google's Ads API using PHP on an agile team.
- Building a model using PostgreSQL with two databases and functions to insert the data from one to another made with pl/pgsql language.
- Creating jobs to parse the response from the APIs using Talend.

#### MICROVERSE

Mentor (Volunteer)

Remote

December 2021 – January 2022

- Mentored junior web developers, providing technical support through code reviews, yielding a 100% satisfaction rate from mentees and instructors.
- Proposed improvements to code organization to boost code quality and overall performance, resulting in a 30% decrease in the long-term cost of maintenance and bug fixes.
- Provided advice and tips on maintaining motivation to maintain longevity in the program, enhancing student retention by 23% from the previous year.

#### Highlighted Projects

**Real state Management** – Full-stack application that allows users to create properties. When users are logged in they get redirected to a dashboard where they can visualize metadata about the properties. Users can sort and filter the properties by price or name.

- Built with: JavaScript, React, Node, MongoDB, Express. [Live Version](#) - [Source Code](#)

**RentUrTech** – This is a React application part of a full-stack project called "RentUrTech". The main goal of this project is to provide users with an environment to reserve a specific product for a set amount of time.

- Built with: JavaScript, React-Redux, Ruby on Rails, and SASS. [Live Version](#) - [Source Code](#)

### EDUCATION

#### MICROVERSE

Remote Full Stack Web Development Program, Full-Time  
2022

Remote

November 2021 – July

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.
- Developed strong communication skills by holding daily standups and weekly retrospective team meetings.
